

14.04.2014 | PRESS RELEASE

BinderGroup will present the new air control valve to the world at IFAT exhibition - Hall A5 Booth 125

VACOMASS® jet control valve in a big German plant

Main features are:

- Energy savings due to extremely low pressure drop based on aerodynamically optimized design with pressure recovery and very precise control function
- Linear operation characteristic from 5-95% stroke with 0-100% usable control range
- Corrosion resistant, gas-tight design, complete in stainless steel type A4 with integrated air flow meter placed directly in front of the valve
- Maintenance free construction with seals and gaskets made of Teflon/Carbon/Viton/PEEK for continuous operation from -40 up to +150°C
- Easy assembly and retrofit without additional reduction or expansion pipe pieces
- Optimization of the biological process and savings in running costs

You would like to find out more?

Please visit us at the fair or now at www.bindergroup.info!

Every day we will visit the closed to the fairground situated big treatment plant München Gut Grosslappen, where 38 VACOMASS® jet control valves are in operation. Take the change and submit the registration paper, the number of participants is limited!
